Other	Length per application <sup>4</sup>
	<ul style="list-style-type: none"> <li>• Type of need</li> <li>• Evidence(s) of need</li> </ul>

## Terms & Conditions

Please ensure that you read the conditions below carefully before signing the application form.

1. A Loan pump is provided only upon approval of application, at the discretion of AMSL Diabetes on behalf of Animas.
2. Failure to provide sufficient details or required documentation may result in delay or rejection of the application.
3. Successful applicants will be allocated a black Animas pump. Depending on stock availability, this may not be the Animas pump model that is currently sold in Australia.
4. Minimum travel time must be 4 weeks. Maximum length is subject to appraisal of the application. Upon acceptance to the program the patient will be advised of the length of the loan and expected return date. Loans will only be provided for overseas travel and are subject to availability. It is the responsibility of the pump user to speak with their diabetes management team about an alternative back-up plan for their travel period.
5. Maintenance of the condition of the pump and any supplied accessories is the sole responsibility of the patient.
6. The pump will be covered by the standard Animas replacement warranty during the period of the loan. Any replacement will not extend the loan period. The faulty pump must be returned immediately following receipt of replacement pump and transfer of data. Clause 9 applies to any such returns.
7. At all times the pump shall remain the property of AMSL Diabetes on behalf of Animas. There is no cost for the loan of the pump, however the patient will be liable in the event of damage or failure to return the goods as described below in Clauses 8-11.
  - a. If incurred, these fees will be charged to the credit card provided.
  - b. If AMSL Diabetes is unable to charge these fees to the provided credit card an alternative method of payment will be sought from the patient.
  - c. If AMSL Diabetes is unable to contact the patient or obtain payment, AMSL Diabetes reserves the right to refer the patient to a debt collection agency.
8. For Trial and Eligibility loans - and other loans at the discretion of AMSL Diabetes - the Animas pump will be provided with: a User Guide; a Pump Clip; and a pre-applied Lens Film. Where supplied, these items must be returned in good condition with the pump at the end of the loan period. Failure to do so will result in the full retail cost of the items being invoiced to the patient.
9. AMSL Diabetes reserves the right to charge the patient \$200 upon return of the pump where it judges that the pump has not been adequately taken care of and that superficial or actual damage to the pump significantly exceeds the normal wear-and-tear that could be expected during the time frame of the loan period.
10. Pumps are required to be returned to the AMSL Diabetes warehouse no later than 5 calendar days following the end of the prescribed loan period. Any pumps not returned by this date will incur a \$100/month fee until returned.
11. AMSL Diabetes reserves the right to charge the patient the full retail cost of the pump, \$8950, if the pump is lost by the patient during the loan period, or is not returned. AMSL Diabetes provides a track able courier bag to ensure safe return. Returning of the pump by any other means, such as by Australia Post, is at the sole risk of the patient.
12. It is the patient's responsibility to arrange for their own pump start within the loan period if required. No extension to loan period will be allowed.
13. The patient agrees to supply credit card details with a minimum of 13 months expiry, to cover any costs required as listed here, should the patient not comply with the conditions of the loan as stipulated in this agreement.
14. The patient agrees to AMSL Diabetes confirming the patient's membership details with the patient's Health Fund.

**An insulin pump should only be used under the continued advice of your Diabetes Educator or Doctor and is not a substitute for professional advice and correct diabetes management.**
